

JOSEPH MULWA

FULLSTACK DEVELOPER

About Me

Driven and aspiring full-stack developer with hands-on experience in crafting and deploying diverse projects using React, TypeScript, and Python. Successfully developed a productivity suite, financial analytics dashboard, and an interactive portfolio, honing skills in responsive design and API integration.

Objectives

General Full-Stack

Motivated and self-taught full-stack developer seeking an internship opportunity to apply my skills in React, TypeScript, and Python while learning from experienced engineers. Passionate about building user-centered applications and contributing to projects that solve real problems through clean, efficient code.

AI & Emerging Tech Focus

Curious and ethically minded developer eager to contribute to innovative teams working at the intersection of software engineering and emerging technologies. Seeking an internship where I can grow my full-stack capabilities while exploring responsible applications of Generative AI, Web3, and data-driven systems.

Product & Impact Driven

Driven by a desire to build tools that improve daily life—such as productivity apps and financial dashboards—I aim to join a collaborative engineering team as an intern where I can refine my development skills, learn modern workflows, and help create accessible, high-impact software.

Education

COPERATIVE UNIVERSITY OF KENYA

Diploma in computer science
October 2024 - December 2025

EASTECH COMPUTER COLLEGE

Web deisgn course
January 2024 - May 2024
